MICROBIAL GENETICS AND MOLECULAR BIOLOGY

S.No.	DATE	TOPICS	PAGE NO.	SIGNATURE
1.		**Isolation of Microbial DNA**		
2.		**Isolation of Microbial RNA**		
3.		**Isolation of Antibiotic Resistant Microbes**		
4.		**Quantification of DNA by Spectrophotometric method**		
5.		**Characterization of plasmid DNA by agarose gel electrophoresis**		
6.		**Isolation of plasmid from *E.coli***		
7.		**Competent cell preparation and Bacterial transformation**		
8.		**Polymerase chain Reaction**		
Blotting Techniques				
9.		**Southern Blotting**		
10.		**Northern Blotting**		
11.		**Western Blotting**		
12.		**Generalized transduction in *E.coli***		
13.		**Restriction digestion of DNA**		
14.		**Ligation of DNA**		
15		**Isolation of mutants by spontaneous mutation-Gradient plate technique**		
16.		**Isolation of auxotrophic and antibiotic resistant mutants by physical mutagens**		
17		**Isolation of auxotrophic and antibiotic resistant mutants by chemical mutagens**		

ENVIRONMENT AND AGRICULTURAL MICROBIOLOGY

S.No.	DATE	TOPICS	PAGE NO.	SIGNATURE
1.		Enumeration of Microoraganisms from air by open plate technique		
2.		Isolation and enumeration of soil microorganisms by bacteria		
3.		Isolation and enumeration of soil microorganisms by fungi		
4.		Isolation and enumeration of soil microorganisms by actinomycetes		
5.		Localization of Arbuscular Mycorrhizae(AM)		
6.		Isolation of *Azospirillum* from soil		
7.		Isolation of *Azotobacter* from soil		
8.		Isolation of *Rhizobium* sp. From root modules of legumes		
9.		Evalution of root module by cross section of legume roots		
10		Isolation of phosphate solubilizing bacteria from soil		
11		Isolation of cyanobacteria from agricultural soil and water		
12		Isolation of bacterial and fungal pathogens from plants		
13		Isolation and identification of air-borne microbes using Reuter centrifuged air sampler		
14		Determination of BOD polluted and pond water		
15		Determination of COD polluted and pond water		
16		Assessment of water quality by MPN technique		
17		Screening of antagonistic bacteria in soil by agar block overlay method
